

Francisco Naranjo Narváez

Web Developer

fconaranjonrvz@gmail.com · Jerez de la Frontera, Spain · linkedin.com/in/francisco-naranjo-narvaez-16231019b · github.com/franciskonaranjonrvz

PROFESSIONAL SUMMARY

Full-stack developer specialized in backend (Python, Django, Flask, REST APIs and Linux). Higher Technician in Web Application Development (DAW) since June 2026, with hands-on experience in WordPress and AI-driven automation. Published a custom plugin on the official WordPress plugin repository and currently building AI agent workflows at nosolowebs.es. Open to remote or on-site roles, anywhere.

SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), Python, PHP, SQL, MySQL, PostgreSQL, Flask, Django, HTMX, Alpine.js, Tailwind CSS

WordPress & CMS: WordPress, Elementor (advanced), WooCommerce, custom plugin development, WPML ecosystem

AI & Automation: AI agents, workflow automation, LLM and external API integration

Tools & Environments: Linux (Mint, Kubuntu), Git/GitHub, Docker (in progress), Plesk, FileZilla, VS Code

EXPERIENCE

Web Developer — nosolowebs.es

Jun 2026 – Present · Jerez de la Frontera, Spain

- Developed and maintained WordPress projects for clients
- Implemented AI-driven automations and agents into real production workflows
- Integrated third-party tools and external APIs into client systems

DAW Traineeship — Digital Road

Feb 2026 – May 2026 · Jerez de la Frontera, Spain

- Built and maintained websites using WordPress and Elementor
- Configured and administered a Moodle e-learning platform
- Managed Linux server administration and system configuration

PROJECTS

Flowly

Full-stack SaaS project management app (Trello/Asana-style) with multi-tenant orgs, kanban boards and live team presence. Built with Django, HTMX, Alpine.js, Tailwind, PostgreSQL and Docker. Live: flowly-production-7876.up.railway.app · Repo: github.com/franciskonaranjonrvz/flowly

HamburgerX SVG Toggle for Elementor

WordPress plugin published on wordpress.org, adding an animated SVG hamburger toggle with 11 animations, controlling Off-Canvas menus and custom elements via CSS selector, with no external dependencies. Built with PHP, vanilla JavaScript, CSS and the Elementor Widgets API. Plugin: wordpress.org/plugins/hamburgerx-svg-toggle-elementor · Repo: github.com/franciskonaranjonrvz/animated-hamburger

Brotons Cabalgatas — Client Website

Full design and development of a corporate client website using WordPress and Elementor, plus server management (Plesk) and several more plugins. Live: brotonscabalgatas.com

Casino Django (Academic Project)

Group project during DAW: a casino web application with multiple classic games, user authentication and balance management, built with Django. Personal contribution from github.com/fnarnar704. Repo: github.com/SergioDawRV/Casino_grupo_3

EDUCATION

Higher Vocational Training Certificate — Web Application Development (DAW)

IES Francisco Romero Vargas, Jerez de la Frontera · Sep 2024 – Jun 2026 · Completed
